Dear Ms. Lamphere,

My work experience with Two Plus Four Construction Company has been excellent over the years. I worked my first project, a twenty four unit apartment project in Wayland, NY, with this company in the 1980's. Since that time I have worked on other projects and I have found the management and staff to be both responsive to the clients requirements and the contract documents.

The staff has been very knowledgeable of the design process and the requirements of the various funding agencies, which have design review and oversight responsibilities.

The work of my architectural firm has been easier because of the management and staff's cooperation through these processes.

Sincerely,

Robert Vollmer, Architect
